

Jesuit paleontologist Pierre Teilhard de Chardin has developed one of the most creative approaches to mysticism in modern times.

He describes the stages of his mystical growth in terms of five concentric circles.

These circles provided him with a sacred path into an ever deepening reality, a reality that is informed as much by the science of his time as it is by his religious tradition. They help us trace his growth and development as he plunged ever more deeply into the heart of matter and into the heart of God, where he found the radiance of a loving, cosmic Person - the God for evolution.

During this retreat, through input, prayer, song, film, contemplative activities, and sharing, we follow Teilhard as he travels ever more deeply from Circle to Circle into the arms of the Cosmic Christ. This account of Teilhard's experience will hopefully guide all those of kindred spirits "who love the world" and who yearn to expand their mystical hearts.

"Love is the most universal, the most tremendous and the most mystical of cosmic forces. Love is the primal and universal psychic energy. Love is a sacred reserve of energy; it is like the blood of spiritual evolution."

Presenter

Kathleen Duffy, SSJ, PhD

Kathleen Duffy, SSJ is Professor of Physics at Chestnut Hill College, where she directs the Interdisciplinary Honors Program and the Institute for Religion and Science. She is editor of Teilhard Studies and serves on the Advisory Boards of the American Teilhard Association and Cosmos and Creation. Her present research deals with the way Teilhard de Chardin's religious writings connect with modern science. She has published several book chapters and articles on these topics, an edited volume of essays entitled

Rediscovering Teilhard's Fire (St. Joseph's University Press, 2010), and *Teilhard's Mysticism: Seeing the Inner Face of Evolution* (Orbis Books, 2014).

The day will come when,
after harnessing space,
the winds, the tides,
and gravitation, we shall
harness for God the
energies of love. And on
that day, for the second
time in the history of the
world, we shall have
discovered fire.
